Sarvan C | Sarvan-0
Hyderabad, Telangana - 500007, India

Objective

Computer Science undergraduate graduating in 2027 with hands-on experience in Python, machine learning, and PyTorch-based diffusion model experiments. Experienced in model training, validation, and data preprocessing, with an interest in entry-level software engineering and AI/ML roles.

Education

- **Geethanjali College of Engineering and Technology** *2023 - 2027*
  B.Tech Cheeryal, India
  - GPA: 8/10.0 (Till 3-1)
- **Narayana Jr College(DNMD)** *2021-2023*
  Secondary Education Dilshuknagar, India
  - Marks : 949/1000

Experience

- **Research Intern** *Andhra Pradesh, India*
  National Institute of Technology Andhra Pradesh May 2026 – June 2026
  - Contributed to the project **Single Image Generation using Diffusion Models** through research and implementation.
  - Implemented and experimented with diffusion-based models including **StructDiff** and **SinDiff** using PyTorch.
  - Conducted data preprocessing, model training, hyperparameter tuning, and qualitative evaluation of generated images.
  - Prepared technical documentation and summarized experimental findings for project reviews.

Projects

- **CryptoPulse** *September 2026*
  Tools: Python, Scikit-learn, FastAPI, React, TypeScript [ ]
  - Built a real-time cryptocurrency direction prediction system for BTC, ETH, SOL, BNB, and XRP using 1-minute market data.
  - Engineered technical market features and trained Logistic Regression models to predict 30-minute price direction.
  - Implemented rolling and walk-forward validation and developed a React dashboard with a FastAPI backend for live predictions.
- **EmotiSense - Emotion Classification** *November 2026*
  Tools: Python | Scikit-learn | NLP | TF-IDF | Linear SVM | Streamlit [ ] [ ]
  - Developed an NLP-based machine learning model to classify text into six emotions: Joy, Sadness, Anger, Fear, Love, and Surprise.
  - Compared multiple ML algorithms, optimized Linear SVM using GridSearchCV, and calibrated prediction probabilities.
  - Achieved 90.43% accuracy and 86.87% macro F1-score; deployed an interactive Streamlit application.

Skills

- **Programming Languages:** C, C++, Java, Python
- **Web Technologies:** HTML, CSS, Java Script, PHP
- **Database Systems:** SQL
- **Tools:** Git,Unreal Engine (Intermediate),Unity (Basic),Godot (Basic)

Leadership Experience

- **President** *09/2025-07/2026*
  The Game Smiths Club [ ]
  - Led a student community focused on game development, design, organizing workshops and collaborative projects.
  - Encouraged creative problem-solving and teamwork within the club's game dev activities.
  - Worked with faculty and peers to promote interest in game development across different departments.

Additional Information

Languages: Telugu(Great proficiency level), English (Great proficiency level), Hindi (Good proficiency level),German (Basic proficiency level), Spanish (Basic proficiency level)
Interests: Game Development, Video Games, Music, Movies, Cricket
Soft Skills: Teamwork, Problem Solving, Adaptability, Leadership
